

IKLIPSE RESET · STANDARD OPERATING PROCEDURE

SOP 03 — Vendor, Collab & Network Growth

Managing paid vendors, nurturing collaborators, and aggressively expanding our creative network.

TIER 1 · EMPLOYEE-FACING

1. The Three Relationship Types

VENDORS

External people/platforms we **pay** for a service or tool, recurring or per-project. *e.g., InVideo (AI video platform).*

COLLABORATORS

No money either way, but the relationship needs **continuous attention** and joint content. *e.g., the Libyan social partners, Aseel, OxfordBasil.*

PARTNERS

Strategic relationships handled at owner level. Routed to Nabil / Biker directly.

[VERIFY] Confirm the exact identities/handles of Aseel and OxfordBasil (treated here as named collaborator examples) and whether InVideo is a paid vendor relationship or a collab.

Valid, Attractive Collaborator Examples

To guide outreach efforts, here are examples of the caliber and type of collaborators we seek:

Category	Example Profile / Company	Notes / Rationale
AI visual directing studio	@baene.studio	 Korea-based (flagged for geo conflict) — use primarily as a high-quality reference/benchmark rather than active outreach.
AI artist / creative director	@zeineldinn__	~18K followers, previous successful collaboration. Excellent target profile.

Category	Example Profile / Company	Notes / Rationale
Major AI video platform	Higgsfield (or creators page)	Major platform with a creator partnership program. High value for co-marketing.
Popular AI tech company	InVideo (already partner)	Existing vendor/partner; deepen and co-create where possible.
AI creator / studio	@vssn.ai	Potential collaborator — AI creative account fitting our niche and aesthetic.
AI creator / studio	@pestakle_	Potential collaborator — AI creative account fitting our niche and aesthetic.
AI creator / studio	@by.shlabu	Potential collaborator — AI creative account fitting our niche and aesthetic.

2. Branding Rules — Non-Negotiable

RED LINE — Iklipse branding must **ALWAYS** be visible. No collab, vendor, or co-created piece goes out without our branding present. We never disappear into someone else's content.

Always aim to post from OUR profile. Default goal is for collab content to be posted from @iklipse_ (or co-posted), keeping the audience and credit on our side. Posting solely from the partner's profile is the exception, not the default.

3. Posting Frequency & Continuous Attention

- 1 Never let relationships lapse.** Key collaborators that were dropped must be re-engaged **urgently**. Neglect is a failure.
- 2 Target ≥ 1 collab per week** (mirrors SOP 02). Fall back to recurring collaborators when no new one is ready.
- 3 Timeline enforcement:** external deadlines align with our **Orange Zone** — partner work must arrive before the private management buffer begins.

4. Follow-Up & Network Expansion (Recurring Checklist)

Owner	Recurring Duty
Shams	Persistent, documented follow-up with all active vendors/collabs — a permanent recurring checklist item.
Sama	Double-checks Shams's follow-up every cycle; nothing slips.
Both (Shams & Sama)	As a recurring checklist item, each sends ≥ 25 unique outreach messages weekly to brand-new potential collaborators to continuously expand the network.

[VERIFY] Confirmed assumption: 25 outreach messages **per person, per week** (Shams and Sama each). Adjust if you meant a combined total or a different cadence.

5. Outreach Approach — Sincere & Human

✨ **Open by genuinely praising their work** — excited, warm, sincere, never templated or cold. Then ask about **their journey**. The goal is a real human connection, not a transactional pitch.

 **VARIANT A — Individual Creator**

"Hey [name] — your work genuinely stopped my scroll, the [specific piece] was incredible. I'd love to know how you got into this and where you're taking it. We're Iklipse, an AI creative studio — and I think there's something fun we could build together."

 **VARIANT B — Agency / Business**

"Hi [team/name] — we've been following [brand]'s output and the consistency and craft really stand out. We'd love to learn more about your story and explore a collaboration that puts both our audiences in front of something exceptional. We're Iklipse, an AI creative & marketing studio."

Adapt freely, but always: praise first → ask about their journey → soft, specific collab invite. Never one-size-fits-all.

6. Collaborator Selection Criteria

✓ Prioritize	✗ Avoid
Strong, coherent brand identity	India, Bangladesh, China, Korea, Japan, Singapore (de-prioritized). <i>Asian Arab Gulf countries are OK.</i> Weak/incoherent branding.

Clear evidence of a **loyal** audience

High, genuine **engagement rates**

Clean, high-quality **AI visual** output

Prioritize GCC & North American
creators

Bought or hollow audiences.

Poor or "off" AI visual quality.

7. How to Find & Vet Collaborators (Toolkit)

Sourcing tactics:

- **Hashtag & sound mining:** search niche AI/creative hashtags (#aivideo, #aifilmmaker, #aicreative) and trending audios; note who consistently appears.
- **"Suggested for you" / similar accounts:** open a known good creator, then mine IG/TikTok/YouTube recommendations branching out.
- **Geo-targeting GCC & NA:** search city/region tags (Dubai, Riyadh, NYC, LA) + niche; filter by language and location cues in bios.
- **Reels/TikTok explore by region:** use location and language signals to surface GCC and North American creators specifically.
- **Cross-platform check:** a serious creator usually shows up on 2+ platforms — confirms they're real and active.

Vetting (spotting real vs vanity):

- **Engagement ratio, not follower count:** look for **2%+** engagement; comments that are real conversations, not emoji spam.
- **Comment quality:** a loyal audience asks questions, tags friends, returns across posts — that's loyalty, not a one-hit viral fluke.
- **Consistency over time:** steady posting and steady engagement beat one viral spike.
- **AI visual quality:** check hands, eyes, text, edges, lighting continuity — the same defect checklist we use internally (SOP 02).
- **Audience overlap:** does their audience plausibly care about what Iklipse does? Niche fit > raw size.
- **Red flags:** sudden follower jumps, generic global comments, engagement that doesn't scale with reach = likely bought.

8. Approval Gate

- 1 Selection shortlist **run by Nabil** (input stage, not final approval).
- 2 **Final approval by either Nabil or Biker.** No collab is posted without one partner's sign-off.

9. Communication & Documentation

Rule	Detail
Centralization	All vendor/collab communication documented in Slack or the CRM. Documented outreach is mandatory and auditable.
Call Recording	Universal rule applies — all calls recorded and accessible to management.
Quality Control	Vendor/collab deliverables pass the same QC pipeline, including the 1% Doubt Rule, before reaching a client or our feed.
