SOP 08 — KPI & Performance Scoring

The unambiguous, evidence-based scoring system that converts performance into pay.

TIER 1 · EMPLOYEE-FACING

Read together with: the Salary & Financial Memo (Base + KPI Cap model), SOP 01 (delivery zones), and SOP 07 (time-off). This document defines exactly how the KPI band is earned each month.

1. The Core Mechanic — A 100-Point Monthly Scorecard

Every employee begins each month with a **KPI score out of 100**, earned across five weighted categories. The score determines **what percentage of the KPI band** (the gap between base salary and the cap) is paid that month.

The number is the number. Pay follows the score; the score follows logged evidence. This removes negotiation and ambiguity entirely.

Score → Pay Mapping

Monthly Score	% of KPI Band Earned	Meaning
90–100	100% (full cap)	Exceptional month
75–89	70% of band	Strong
60–74	40% of band	Acceptable

40–59	15% of band	Underperforming
Below 40	0% — base only	Failing

The cap is deliberately hard to reach. Full cap requires a near-flawless month. This is by design — the cap is an earned ceiling, not a default.

2. The Five Categories & Weights

#	Category	Weight	What it measures
1	Attendance & Punctuality	15	On-time login/logout, 9 productive hours, break-button compliance
2	Delivery & Timeliness	30	Client deadlines AND internal filing — tied to the Orange/Red/Black zones
3	Communication — Responsiveness	15	The senior-management react-then-reply protocol; SLA response times
4	Communication — Quality & Proactivity	15	Extroverted, detailed, warm comms; proactivity; no one-word replies
5	Education & Growth	25	Weekly mandatory training + mini-assignments completed

Education is the second-heaviest category by design. Continuous learning directly drives pay — it is non-negotiable and weighted accordingly.

3. Per-Category Scoring Rubrics

Every adjustment is tied to a **countable, logged event** — never a vibe.

1 · Attendance & Punctuality (15)

Event	Adjustment
Start at full	15
Late login	–2 each
Early logout / under 9 productive hours	–2 each

Missed break-button check-in	-1 each
Unapproved absence	-5 each

2 · Delivery & Timeliness (30)

Event (from SOP 01 zone log)	Adjustment
Start at full	30
Early / on-time delivery	+ up to 3 bonus
Internal filing late	-3 each
Orange zone entry	-3 each
Red zone entry	-10 + strike flag
Black zone (client deadline breached)	Category zeroed + -10% base penalty (per Salary Memo)

3 · Communication — Responsiveness (15)

Critical, no-exception rule: when senior management (Nabil, Biker, Sama) messages, the recipient must **react immediately to acknowledge, then reply directly**. No such message is ever skipped.

Event	Adjustment
Start at full	15
Senior-management message not acknowledged within SLA	-3 each
Ticket / client message missed against its SLA	-2 each

4 · Communication — Quality & Proactivity (15)

Event	Adjustment
Baseline	10 (room to earn up to 15)
Proactive update / flagging a risk early	+1 each (cap 15)
Detailed, clear handoffs	+1 each (cap 15)
One-word / cold reply (no valid reason)	-1 each

Logged complaint, harsh tone, or out-of-role behavior

−3 each

5 · Education & Growth (25)

Event	Adjustment
Each weekly assignment completed on time	Full pro-rata share
Assignment late	Half share
Assignment missed	Zero for that assignment
Skill test passed above threshold	+ bonus toward cap

4. How Scoring Actually Happens (Governance)

The guiding principle: **the system scores by default; humans only adjust the genuinely subjective slice — and even that is evidence-checked.**

Source	Categories	Points	Who/what scores
A. Automated (objective)	Attendance, Responsiveness, Education	55	Employee-management software + ticketing logs. No human opinion.
B. Documented events	Delivery & Timeliness	30	The Orange/Red/Black zone log (recorded facts, not opinion).
C. Managerial input (subjective)	Comm Quality & Proactivity	15	Proposed by the assigned manager with cited evidence.

85 of 100 points are objective or event-based. Only 15 points are open to human judgment — so subjectivity can never dominate pay.

Who Scores the Subjective 15 Points

- 1 Manager proposes:** the assigned manager (Sama for the ops/creative team) proposes the Comm-Quality score — **each adjustment must cite a specific logged example**, never a vibe.

- 2 Owners ratify: Nabil and Biker** are the final scoring/ratification layer. They approve or adjust strictly against the cited evidence.

Managers themselves (Sama, Sameh, Yusuf) are scored directly by Nabil and Biker. No single person ever controls another's pay alone.

Monthly Cadence

- 1 **Continuous:** the system logs attendance, responsiveness, education, and delivery-zone events in real time all month.
▼
- 2 **Month-end auto-draft:** the system auto-generates ~85% of each scorecard from its logs.
▼
- 3 **Manager input:** the assigned manager fills only the 15-point Comm-Quality box, with cited examples.
▼
- 4 **Ratification:** Nabil and Biker approve/adjust against evidence; red-line events and the coaching-call counter are applied as overlays.
▼
- 5 **Publish:** each person sees their own scorecard with line-item reasons — transparent and appealable.

5. Safeguards (No Ambiguity, No Favoritism)

Evidence-or-it-didn't-happen: no points are moved without a logged event ID, screenshot, or timestamp. This protects everyone — including management — from disputes.

Calibration check: if a manager's average given scores drift far from the system-generated 85%, it is auto-flagged to the owners — catching both over-generous and overly harsh managers.

Appeals

Appeal ladder: raise a ticket → if no reply within 3 days, the nudge feature re-sends → escalate to Sama / Sameh / Yusuf. Every score is line-itemized, so appeals are about evidence, not opinion.

6. Red-Line Overlays (Bypass Scoring Entirely)

These are termination triggers, not point deductions:

- **4 Red-zone strikes** → immediate, no-notice termination.
- **2nd Black-zone offense** → termination after the one prior warning.
- **Private work-comms reported 3 times** (per SOP 01) → immediate termination.

Coaching-call counter: causing more than **2 coaching calls in a month** = a warning; repeated months put the employee at risk of termination. Tracked separately from the points.

7. Custom Scorecard — Fawzy (Lead Media Buyer)

Fawzy's KPIs are tied entirely to Iklipse media-buying performance. His base is intentionally low; the bulk of his pay is earned through results. The **Delivery category is replaced** by media-buying outcomes; Attendance, Communication, and Education remain identical to everyone else.

#	Category	Weight	What it measures
1	Attendance & Punctuality	15	Same as standard
2	Media-Buying Performance	30	ROAS / ROI targets, spend efficiency, and campaign results for Iklipse — against agreed monthly targets
3	Communication — Responsiveness	15	Same as standard
4	Communication — Quality & Proactivity	15	Same as standard
5	Education & Growth	25	Same as standard

[VERIFY] Fawzy's exact media-buying targets (ROAS/ROI thresholds, spend bands) and the SLA minutes for the responsiveness rule will be specified and documented in line with the latest update of the central system.
