

IKLIPSE RESET · STANDARD OPERATING
PROCEDURE

SOP 14 — Education & Training Hub

The weekly extracurricular requirement, per-person gap targeting, and the agentic AI assignment flow.

TIER 1 · EMPLOYEE-FACING

Read together with: SOP 09 (Quality Control) and SOP 08 (KPI Scoring).

1. The Weekly Requirement

Continuous improvement is a non-negotiable part of the Iklipse doctrine. The company now guides and hand-holds rather than just demanding improvement.

1 educational session + 1 educational task per week is required for everyone. This is **NOT time-tracked** and is **NOT within official working hours**. It requires your personal contribution.

2. Targeted Skill Development

Assignments are not generic. They are assigned **per-person, relevant to each person's actual observed gaps** against current market standards.

Focus areas include:

- Digital marketing and sales
- Presentation and communication
- Design updates and visual standards
- AI tools and advanced intelligent workflows

Additional self-evaluating QC materials will be provided as part of this hub to help individuals pre-check their work against the full standard (per SOP 09).

3. The Agentic AI Flow

To ensure this process is seamless for management, an **agentic AI assistant** manages the assignment and testing flow.

- 1 **Management Prompt:** Top management voice-prompts the AI (e.g., "find videos on advanced prompt engineering for Joe").

- 2 **Curation:** The AI finds relevant materials and asks management which to assign as the tutorial.

- 3 **Assignment:** The AI agentially suggests and assigns a specific task or test of the team member's skill based on that tutorial.

- 4 **Evaluation:** The team member completes the extracurricular task, which feeds back into their KPI scoring (SOP 08).
