SOP 15 — Newsletter & Email Automation

Continuous email automation, the Tuesday-Thursday-Monday cadence, list consolidation, and the 3-tier approval process.

TIER 1 · EMPLOYEE-FACING

Read together with: SOP 16 (Finance & Invoicing) for invoice traceability integration.

1. The Non-Negotiable Continuous Operation

The newsletter and email automation is a separate compartment that must be initiated and upheld continuously. Pausing it costs time, money, and opportunity. It must never be paused again.

Audience & List Consolidation

One consolidated weekly email is sent via **MailChimp** to all audiences, with the ability to send differentiated emails per list when necessary. The lists include:

- Existing client list (subject to compliance/consent check)
- Main lead list
- Everyone ever invoiced (via invoice traceability)
- The entire Doers lead list
- Active clients
- The Manychat list + corresponding Gumroad list

2. Setup, Ownership & The AI Workflow

Sameh is responsible for setting up MailChimp. Nabil will provide an AI workflow blueprint, with technical implementation by **Abdur Rahman (Abdu)**, the AI specialist.

The Newsletter Slack Group: A dedicated channel acts as a dump for anything that could work as content (completed projects, new offers, achievements). Top management can voice-prompt the AI agent to feed ideas; the AI develops the newsletter and sends it back for approval.

Content Examples

Article features, celebrating active big clients, celebrating new team members, project/growth milestones (tied to vouchers/discounts/raffle), and fun, relevant AI news (e.g., "how AI is impacting branding this week").

3. The Weekly Cadence & Approval

The central automation ("center mother hub") flags lateness. Failure on the final milestone is a major violation of the agreement.

- 1 **Tuesday EOD:** Agent collects info from the dump and produces a draft. Draft must be approved by Tuesday EOD max.
↓
- 2 **Thursday EOD:** Revise, recap, polish, design, export, and get final approval. Visual polish is done by Sameh (via Canva); if unable, involve a designer (Karim or Rabah).
↓
- 3 **Monday:** The polished, scheduled newsletter goes out every week like clockwork.

The 3-Tier Approval Process

Content approval must follow this exact order: **Sameh** → **Biker** → **Nabil**.

Promotions

At least **twice a month**, the newsletter must include interactive elements (vouchers, discounts, raffle, "spin the wheel" for mid-tier clients) or additional targeted/tracked promo emails.
